

Will the broadcast flag interfere with consumers ability to make copies of DTV content for their personal use, either on personal video recorders or removable media?

This proposal will interfere with 'My Rights', as a free person within these United States, to exercise 'My Rights' and use that which that which, when purchased by me, is mine to 'FULLY USE' as 'I' deem responsible.

Would the digital flag interfere with consumers ability to send DTV content across networks, such as home digital networks connecting digital set top boxes, digital recorders, digital servers and digital display devices? This 'proposal' would limit 'My Rights' to send and share DTV content throughout 'My Personal' network, where ever that may be.

Would the broadcast flag requirement limit consumers ability to use their existing electronic equipment (equipment not built to look for the flag) or make it difficult to use older components with new equipment that is compliant with the broadcast flag standard?

This proposal would prevent and/or limit me from fully utilizing 'My' equipment for my use.

These limitations are/and controlled by a private, for profit third party entity or entities, and it's not within the public interest or good.

Would a broadcast flag requirement limit the development of future equipment providing consumers with new options?

This would limit development and research into the advancement of innovative technology upon which United States depends in order to maintain a competitive global economic environment.

What will be the cost impact, if any, that a broadcast flag requirement would have on consumer electronics equipment?

Possible unwarranted regulatory fees that would benefit a few private-for-profit parties.

Other Comments:

'Rights', whether digital or otherwise belong and are reserved unto the individual person. ONLY The Individual Person, whether through their elected representatives or civil servants appointed by the Individual, either individually or communially, determine, voluntarily, what 'limitations' to place upon themselves.
